

Saurabh Patel

Android Developer | AIML Engineer

Idar, Gujarat | +91 6354539747 | saurabhpatel6464@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Android & AI/ML Developer with hands-on experience in building mobile apps using Java, Kotlin, and Flutter, and developing intelligent solutions using Python. Skilled in REST APIs, UI/UX design, and computer vision (YOLOv11, EasyOCR). Built projects like **JARVIS AI Assistant**, **Number Plate Detection**, **Currency Converter**, **Video Streaming**, and **Blinkit Clone (UI Design)**.

CORE SKILLS

- **Languages:** Python, Java, Android Development, Flutter, REST API Integration, Payment Gateway, SQL
- **Machine Learning:** scikit-learn, NumPy, pandas, Matplotlib
- **Computer Vision:** OpenCV, YOLOv5/Yolov11, OCR
- **AI & Automation:** Speech Recognition, pyttsx3 (Text-to-Speech), Real-Time Object Detection
- **Web Development:** HTML5, CSS3,
- **Tools & Platforms:** Jupyter Notebook, Git, GitHub

PROJECTS

JARVIS: AN AI ASSISTANT |

Feb 2024 – May 2024

- Built with Speech Recognition to browse the web, launch apps, play Spotify songs, and send WhatsApp messages via voice commands.

Two wheeler Number Plate Detection |

Feb 2025 – April 2025

- Developed a real-time number plate detection system using YOLOv11 for accurate plate localization and EasyOCR for text extraction. Implemented live video feed processing to identify and read vehicle registration numbers efficiently

Currency Converter App

- Developed a real-time currency converter using REST API integration to provide instant and accurate currency exchange rates. Designed an intuitive UI for smooth user experience and quick conversions between multiple global currencies.

Video Streaming App

- Created a video streaming application leveraging the YouTube API for fetching and displaying live video content. Integrated AdMob ads (banner, interstitial, and rewarded) to enable app monetization and enhance user engagement.

Blinkit Clone App (UI Design)

- Designed a **Blinkit-inspired grocery delivery app interface** using Flutter. Focused on creating a **clean, responsive, and user-friendly UI** with screens for product listing, cart, and checkout to showcase front-end design skills.

EDUCATION

BTech In AIML | Charusat University Changa | CGPA: 7.37

June 2023 – present

Diploma In IT | Government Polytechnic Himmatnagar | CGPA: 7.83

May 2020 – May 2023

INTERNSHIP EXPERIENCE

- Completed a 5-week internship exploring Oasis Info byte
- Android Development with java

CERTIFICATE

IBM: Develop Generative AI Applications

NPTEL: Introduction to Machine Learning

Samatrix: Data analysis using python | Foundation to AI Data Science & Data Analytics

Red Hat Certificate,

Courses : C, Android, Python programming
